Introducing the Couillard Solar Foundation solar canopy. A sleek, elegant design with bifacial solar technology - a combination that makes solar captivating.

PLUS: All net proceeds go to fund the mission of CSF.

**Benefits**
- A beautiful, functional solar array with an elegant design fitting any aesthetic
  - Residential/commercial
  - Pergolas/pavilions
  - Carports
  - Parking lot shelters
- Weatherproof, light weight and easy to install
- Flexible design
  - Canopy is sold separately. You decide the support structure that works for you
  - 3 different lengths - as large or small an array as you need (minimum of 4 ladders)
- Bifacial panels create power from both front and back of the panel, take advantage of early/late light and are well suited to snowy climates
- Both canopy and support structure eligible for Investment Tax Credits (also depreciation for business)

With this unique, modular approach, design your array to accommodate the available footprint, desired power output and aesthetic requirements.

Each “ladder” consists of one beam, a row of panels and associated hardware. Order as many ladders as you need, with the final end cap to complete the full canopy design.

**Specifications**
- **Product includes the canopy only:**
  - Designed specifically for included bifacial panels
  - Black anodized aluminum beams and tie bars
  - All associated hardware and clamps
- Panels are 445w ZenShine bifacial solar panels
  - Specifications for panels available on request
- Canopy is made up of a series of ladders with each ladder available in 3 sizes
  - 2 Deep (Produces 890 watts) - holds 2 panels
  - 3 Deep (Produces 1335 watts) - holds 3 panels
  - 4 Deep (Produces 1780 watts) - holds 4 panels
- Product is designed for free-standing installation only (not attached to a building)
